PATENT COOPERATION TREATY PCT

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference FP2611PCT	FOR FURTHER ACTION	See Form PCT/IPEA/416			
International application No. PCT/JP2003/012254	International filing date (day) 25 September 2003 (2:				
International Patent Classification (IPC) or n	ational classification and IPC .61K 31/501, 31/5025, 31/5	06, A61P 1/04, 3/10, 9/10, 17/06, 19/02, 19/10,			
Applicant	UBE INDUSTRIES	, LTD.			
 This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 					
 This REPORT consists of a total of This report is also accompanied by a 		ing this cover sheet.			
-		total of sheets, as follows:			
and/or sheets con	sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).				
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.					
b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).					
4. This report contains indications rela	iting to the following items:				
1 =	Box No. I Basis of the report				
Box No. Π Priority		,			
Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability					
Box No. IV Lack of unity of invention					
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability citations and explanations supporting such statement					
Box No. VI Certain documents cited					
Box No. VII Certain defects in the international application					
Box No. VIII Certain observations on the international application					
Date of submission of the demand	Date	of completion of this report			
24 March 2004 (24.03	.2004)	06 December 2004 (06.12.2004)			
Name and mailing address of the IPEA/JP		Authorized officer			
Facsimile No.		none No.

V.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement						
1.	Statement						
	Novelty (N)	Claims	1-36	YES			
		Claims		NO			
	Inventive step (IS)	Claims	<u> </u>	YES			
		Claims	1-36	NO			

2. Citations and explanations

Industrial applicability (IA)

Document 1: WO 00/39116 A1 (Teikoku Hormone Mfg. Co., Ltd.), 6 July 2000 & CA 2356263 A & EP 1142890 A1 & US 6511997 B1

Claims

Claims

Document 2: WO 95/31451 A1 (SmithKline Beecham Corp.), 23 November 1995 & US 5559137 A & JP 10-500413 A & EP 871622 A1 & US 5998425 A & US 6306883 B1

Inventive step

The inventions set forth in claims 1-36 do not involve an inventive step in the light of documents 1 and 2.

Document 1 discloses, as compounds having a p38 MAP kinase inhibiting action, pyrazole derivatives having a substituted or unsubstituted phenyl group on position 3 of the pyrazole, a pyrazyl group on position 4 and an optionally substituted amine bound to position 5. It further discloses such pyrazole derivatives wherein there is a hydrogen atom, a substituted or unsubstituted lower alky group or a substituted or unsubstituted aryl group bound to one of the nitrogen atoms forming the pyrazole ring. These pyrazole derivatives differ from the compounds described in claims 1-33 in that in the compounds described in claims 1-33 it is specified that the nitrogen

International application No. PCT 03/12254

atom bound to a specified group is in position 1 in the pyrazole ring, and in that there are restrictions as to the specified group. However, since the position of the bonding nitrogen atom is not specified in document 1, the disclosure therein should naturally be considered to include the case where the bond is on the nitrogen atom in position 1; moreover, in document 2 it is indicated that in similar compounds the bond is on the nitrogen atom in position 1. Therefore, no particular difficulty is discovered in specifying position 1 as the position of the bond to the nitrogen atom in a compound disclosed in document 1. Similarly, as regards the groups which can be bound to the nitrogen atom, in addition to the relevant disclosure in document 1 referred to above, document 2 indicates the use of a heteroaryl group as the group bound to the nitrogen atom on position 1. Therefore, a person skilled in the art could easily use specified groups selected from among heteroaryl groups in compounds having the same structure described in claims 1-33; and there is no discernable surprising effect as a result of so doing.
